LUMBOSACRAL SPINE MRI WITHOUT CONTRAST

1.5 Tesla MR System.

Multislice, multiplanar and multisequence MR images:

*Disc dehydration: **distal levels.***

Posterior or posterolateral disc:

*L5-S1 disc: **posterior disc protrusion mostly in left side and endplate irregularity with moderate canal and foraminal stenosis mostly in left subarticular region.***

*L4-L5 disc: **mild disc bulging with mild canal and foraminal narrowing.***

*L3-L4 disc: **minimal disc bulging.***

L2-L3 disc: none

L1-L2 disc: none

T12-L1 disc: none

T11-T12 disc: none

*Bones and bone marrow: **distal marginal osteophytes and endplate irregularity.***

Distal cord and conus medullaris: normal

Paravertebral soft tissue: unremarkable

Lumbar spine curve: normal

Impression: degenerative discopathy.

With best regards;
